- Assists with Office 365.
- Assists with VBS scripting, and batch scripting.
- Assists with web site design HTML, CSS, JavaScript.
- Assists with principles of chemistry.

PERSONAL PROJECTS

❖ Python project:

Simple/basic virtual assistant practiced and housed on GitHub [MIMI](#) (My Intelligent Me). My virtual/personal assistant keeps me on track. It is so polite that it opens with a greeting tells me the time when requested helps me search through my song playlist, opens applications that I need to work, has a list of certain websites I usually visit on the internet and does quick Wikipedia searches for me. My AI most important role is that it grants me access and I take it from there. Task were assigned on reddit, discussions happened on discord, JIRA was my process tracking tool, visual studio code was my IDE, and code was housed on GitHub.

❖ MySQL Project:

The purpose of this project “[Legacy Lending Library](#)” was to go through a database’s development life cycle, that is from the Analysis phases to the design stage and unto implementation.

❖ Websites and Web pages:

[Websites and Web-pages](#) created using, HTML5, JavaScript5, CSS3, and php.

❖ Mobile apps created:

[Enhanced Dice Roller App \(Java\)](#)

[Dice Notation with Fragments \(Java\)](#)

[Dice Notation with Fragments with Persistence \(Java\)](#)

[Bounce Surface View Gamification \(Java\)](#)

These apps were created using android studio, java, dart code, GitHub, and SourceTree. With these app, I have demonstrated the use of layouts and widgets, activities, and intents both explicit, and implicit, including the activity life cycle. More skills are menus, dialogs, touch, fragments, working with data, running background tasks. Additional knowledge are graphics, animation, and sound. Using inbuilt features like sensors, camera, and location.

❖ Other skills:

Oracle, Python3, Batch scripting, including knowledge of fundamental networking concepts, basic networking infrastructure, internet protocol, local area networking, networking services, networking security, OSI model, TCP-IP, wide area networks, wired and wireless networks, JIRA, Trello, React, Gatsby, Cisco packet tracer, Testing, node JS, Mongo Db, visual studio code, Angular, IntelliJ, PowerShell, GitHub, SQLite, Firebase, Visual Basic Script, Astah Professional, Audacity, Photoshop for flier creation and magazine covers, flutter, Illustrator, Blender, processing, premiere, iMovie, Office 365.

EDUCATIONAL PROJECTS

- ❖ Random Java projects housed on GitHub (request GitHub link)
 - ❖ Random Web development projects on GitHub (request GitHub link)
-

EDUCATION

Georgia Gwinnett College <i>Lawrenceville, GA</i> Bachelor of Science in Information Technology Conc. Software Development	<i>May 2021</i>
University of OSLO <i>University in OSLO, Norway</i> Master's in Informatics: Information Security	<i>May 2022</i>

CERTIFICAIONS

- MTA: Networking Fundamentals – Certified 2019
- CEH: Certified Ethical Hacker – Certified 2021
- CISSP: Certified information systems security professional – Certified 2023
